November 3, 1982

Mr. Marc Nelson  
Minerals Management Service  
South Central Region  
505 Marquette Avenue, N.W., Suite 815  
Albuquerque, New Mexico 87102

Dear Marc:

This letter is to inform you of the change in location of the P-10 air monitoring station at the Jackpile Mine. The move was made on October 28, 1982. The move was necessitated by the upcoming electrical power shutoff for the total P-10 mine area.

The move from the former location to the present location was approximately 100 yards in a southwesterly direction. The data base established at the former location is still valid for the new location due to the short distance of the move. The station will continue to collect ambient air radon measurements and air particulate data at the same frequency as at the previous location.

If you have any questions or need further information, please give me a call.

Sincerely,

*Meade A. Stirland*  
Meade A. Stirland, Manager  
Environment, Health & Safety
